

ENGINE CARE

The Shield Additive Engine Range conforms to tested OEM and API specifications to provide efficient and safe maintenance, cleaning and protection of engine components. Suitable for use in petrol & diesel engines. The Shield Additive Engine Range contains no harmful additives i.e. alkalis or acids and is not formulated using solid particle lubrication.

La Gamme Shield Additive Engine répond aux essais OEM et aux normes API pour fournir un entretien efficace et sûr ainsi que le nettoyage et la protection des composants du moteur. Convient à un usage sur les moteurs à essence et diesel.

La Gamme Shield Additive Engine ne contient pas d'additifs nocifs tels qu'alkalis ou acides et n'est pas formulé à base de particules solides de lubrification.

A Gama de Produtos para Motores "Shield Additive Engine Range" é compatível com os ensaios realizados pelos OEM e com as especificações API, a fim de providenciar uma manutenção eficiente e segura, bem como a limpeza e proteção dos componentes dos motores.

É apropriado para uso em motores a gasolina e a gasóleo. A gama de produtos "Shield Additive Engine Range" não contém quaisquer aditivos prejudiciais, ou seja, ácidos ou alcalis, e não é formulada usando a lubrificação sólida de partículas.

A GUIDE TO HELP YOU KEEP YOUR CAR IN SHOWROOM CONDITION - INSIDE & OUT

WASHING

E Frequent washing of your vehicle is an essential. Washing removes grime and environmental contaminants. Over time dirt and grime that is not regularly cleaned from the vehicle can lead to dulling and fading of surfaces.

Never use household detergents to clean the car, they strip away the protective outer wax layer.

F Un lavage fréquent de votre véhicule est essentiel. Le lavage retire la crasse et les contaminants environnementaux. Avec le temps, la crasse et les impuretés qui ne sont pas régulièrement retirées du véhicule peuvent conduire à des surfaces ternes et décolorées.

Ne jamais utiliser de détergents domestiques pour nettoyer la voiture, ils découpent la couche de cire de protection externe.

P A lavagem habitual da sua viatura é importante. A lavagem permite a eliminação de sujidade e de contaminantes ambientais. Ao longo do tempo, a sujidade que não é eliminada da sua viatura regularmente, pode causar o desbotamento e descoramento das superfícies.

Nunca utilizar detergentes domésticos para lavar o carro porque desgastam a camada de cera protectora exterior.

SH1107	High Foam Car Shampoo 5 L

WHEEL & TYRE CARE

E Before washing ensure wheels are cool from driving. Wash Tyres and Mags to remove surface dirt. Apply evenly, avoiding overspray onto tyre tread and brake parts. Use an old toothbrush or cloth to remove excessive dirt. Remove excess spray from all surfaces.

F Avant lavage s'assurer que les roues ont refroidi après la conduite. Laves les Pneus et Jantes pour retirer la crasse de surface. Appliquer de façon homogène en évitant l'arrosage excessif des surfaces de roulement et des pièces de frein. Utiliser une vieille brosse à dents ou un chiffon pour retirer l'excès de crasse. Retirer les excès d'arrosage sur toutes les surfaces.

P Antes de lavar, certificar-se que as rodas estão frias após a condução. Lavar os pneus e as jantes para retirar a sujidade superficial. Aplicar uniformemente, evitando espalhar sobre o trilho dos pneus e as peças dos travões. Utilizar uma escova de dentes velha ou um pano para retirar a sujidade excessiva. Eliminar o produto excessivo de todas as superfícies.

CLEANING AND DETAILING

E Make sure you have the correct detailing products. Using quality products that are not abrasive is very important. Use products that are lint free and won't trap dirt onto the surface, causing scratches and swirl marks.

F Assurez-vous de posséder les produits de finition corrects. Il est important d'utiliser des tissus de qualité qui ne soient pas abrasifs. Utiliser des tissus qui ne peluchent pas et n'enfermentent pas la crasse en surface, occasionnant des rayures et des marques de tourbillons.

P Deve-se garantir a utilização de produtos correctos de limpeza cuidadosa. A utilização de produtos de qualidade não abrasivos é muito importante. Devem-se utilizar produtos sem coar e que não deixem sujidade nas superfícies que possam causar riscos e marcas de redemoinho.

KANE20	Absorber Superdry PVA Chamois
SH260	Wipe n Dry Chamois
SH192	Splash n Dash Auto Sponge

WAXING

E Waxing is the single most important action needed to extend the life of your car's paintwork. Paintwork is constantly under attack from various environmental factors and needs protection. It is best to apply wax in a shaded area. Use a small amount of wax. Over application can cause swirl marks and wax becomes difficult to remove.

Not for use on dirty cars.

F Le cirage est l'application le plus importante nécessaire à la prolongation de la vie de la peinture de votre voiture. La

peinture est constamment sous les attaques de divers facteurs environnementaux et nécessite une protection. Il est préférable d'appliquer la cire dans une zone ombragée. Utiliser une petite quantité de cire. Une application excessive peut provoquer des marques de tourbillons et la cire devient difficile à enlever.

Ne pas utiliser sur des voitures sales.

P A aplicação de cera de polimento é uma das actividades mais importantes necessárias para prolongar a vida útil da pintura da sua viatura. A tinta de qualquer viatura está constantemente a ser afectada por vários factores ambientais e necessita de ser protegida. É melhor fazer a aplicação da cera na tinta à sombra. Deve usar uma pequena quantidade de cera. O uso de uma quantidade excessiva de cera irá causar marcas de aplicação e torna-se depois difícil a remoção do excesso.

Não deve ser usado em automóveis que estejam sujos.

INTERIOR PRODUCTS

E Prolonged exposure to sun causes surfaces to become hard, brittle and faded. Detailing these surfaces on a regular basis with products that contain UV protectors and plasticizers will prevent discolouration and cracking.

Avoid overspray onto windcreens, steering wheels and foot pedals.

F L'exposition prolongée des surfaces au soleil les durcissent et les rendent fragiles et décolorées. L'entretien régulier de ces surfaces avec un produit contenant des protections contre les UV et des plastifiants préviendra contre la décoloration et les craquelages.

Éviter de trop arroser les pare-brises, volant et pédales.

P A exposição prolongada ao sol causa o endurecimento, a quebra e o desbotamento das superfícies. A limpeza cuidadosa e regular destas superfícies com produtos protectores UV e plastificantes evitará a descoloração e a fissuração.

Evitar a aplicação excessiva de produtos em pára-brisas, volantes e pedais.

MICROFIBRE

E Ultimate results when cleaning, polishing and detailing vehicle surfaces.

Microfibre have a wedge shaped structure that lifts dirt and moisture. Ordinary fibres push dirt and moisture around.

- Lint Free
- Streak Free
- Swirl Free
- Non Abrasive

F Résultats supérieurs lors du nettoyage, polissage et entretien des surfaces du véhicule.

Microfibre possède une structure cunéiforme qui soulève la crasse et l'humidité. Les fibres ordinaires repoussent la crasse et l'humidité aux alentours.

- Sans Peluches
- Sans Trainée
- Sans Tourbillons
- Non Abrasive

P Obtém os melhores resultados na limpeza, polimento e retoque das superfícies das viaturas. Os panos tipo microfibras têm uma estrutura com forma de cunha que levanta as poeiras e absorve a humidade. Os panos com fibras normais empurram as poeiras e espalham a humidade.

- Sem pêlos
- Não causa riscos
- Não deixar marcas
- Não abrasivo

UPHOLSTERY AND FABRIC

E Vacuum upholstery and fabric to remove loose dust and ingrained dirt. Do not over wet the fabric.

F Passez les garnitures et tissus à l'aspirateur pour retirer la poussière et la crasse incrustée.

Ne pas trop humidifier les tissus.

P Aspirar o estofamento e os materiais para eliminar o pó solto e a sujidade impregnada.

Não molhar os materiais excessivamente.
